

Testimonials

"I am a big fan of this product. In equine medicine today stomach ulcers are a regular problem and have a big impact on appetite. Equigain is a feed additive which I have seen significantly alleviate the symptoms of ulcers. Horses are happier, have an improved appetite and look and perform better."

- Glenn Robertson-Smith
Leading Equine Veterinarian

"Equigain has had a hugely positive impact on the condition of the horses I've fed it to - especially those that have arrived at my stables in very poor condition with high grade ulcers. Within 2-3 weeks they gain significant weight, are happier in themselves and much more comfortable in their work. I can't recommend it highly enough."

- Lisa Coffey
Horse Trainer and Educator

Regulatory

- Manufactured in Australia under GMP conditions by The Product Makers Australia Pty Ltd
- Returns a clean race swab (100% natural raw material)
- LGC UK certified
- Australian Pesticides and Veterinary Medicines Authority (APVMA) approved

THE PRODUCT MAKERS
BIOACTIVE DIVISION

Equigain™

Equigain™ is a registered trademark of The Product Makers (TPM). TPM holds numerous global patents on the production and properties of Equigain™.

Equigain™ is a natural plant extract from *Saccharum officinarum*, it is polyphenol rich, high in anti-oxidants, rich in minerals, nutrients and essential amino acids.

Equigain™ is a natural feed additive that enhances appetite and improves the appearance of horses.

Suitable for all breeds of horses in any equestrian discipline from racing to leisure riding including breeding and spelling stock.

Ingredients

Natural Sugarcane Extract (*Saccharum officinarum*)

Dosage

Shake well before use. Mix approximately 20ml per 100kg (horse body weight) per day into feed, water or direct into horses mouth (Eg 500kg horse dose is 100ml).

If the horse is in poor condition a double dose (40ml per 100kg horse body weight) can be used for the first 2-3 weeks.

Benefits
